Order from OTS or SLA \$1.10 63-23958

Trans. of Elektricheskie Stantsii (USSR) 1954, v. 25,
no. 4, p. 36-41.

DESCRIPTORS: *Electric insulation, *Semiconducting
film, *Ceramic coatings, Electrical properties,
Electrical engineering.

This article presents a method of increasing the op-
erational reliability of insulators in areas of heavy
contamination by coating them with a semi-conducting
glaze. Operational experiments established that the
semi-conducting glaze distributed the voltage more
evenly over the surface of the insulator. And that the
insulator was heated by leakage currents giving it better
